

## SMALL INTESTINE

## Matching

39. The small intestine is divided into three sections: the duodenum, the jejunum and the ileum. For each of the statements in Table 12.2, decide to which section it applies by ticking the relevant box in the table.

*12<sup>4</sup> негетив - моруа 2 ногбзген.*

	Duodenum	Jejunum	Ileum
Longest portion of the small intestine			
Curves around the head of the pancreas			
Vitamin B <sub>12</sub> is absorbed here			
About 25 cm long			
Middle section			
Ends at the ileocaecal valve			
Flow in is regulated by the pyloric sphincter			
Most digestion takes place here			
About 2 m long			
Flow from here enters the large intestine			
Bile passes into this section			
The pancreas passes its secretions into this section			
Villi present here			
Most absorption takes place here
